

**Bismillah, Ar Rahmaan, Ar Raheem**

Alhamdolillahi Rabil 'Alimeen. Wa salatu wa salamu 'ala Rasulullah.'Amma ba'd:

A message to our brother and sisters on the path of Jihad in the East and West. This is a heart-felt Salamu Alaikum Wa Rahmatullahi Wa Barakatuhu to you and your families. May Allah, Azza wa Jal, accept your deeds and protect your efforts, ameen.

This advice is made under the noses of the leaders of kufr and has been accumulated with great pain and thorough knowledge of their tactics and schemes. This may be the last document we ever write, so, mercy for the one who takes heed (inshallah).

**Title: GPS for the Ghurabah in America (the West)**

**"How to Avoid the Fangs of the United Snakes"**

1. Agent Agenda
2. Agent Surveillance
3. Agent Tactics
4. GPS for Al-Mujahideen

## Agent Agenda

- The Agent wants to first assess your threat level and your "ability" to carry out your threat. This is done by collecting intelligence on you or if the source (a snitch) brings credible info to their attention. Unfortunately, in the US it is probably your Imam.
- To define your threat or intentions and its scope. Agents will take enough time as needed determine your intentions. They like to catch you about to commit the act. Therefore, they will spend a considerable amount of time tallying data (between a few months or even years).
- To measure and define the depth of your cell. One of the many questions is the depth of your cell. This is why, currently, we suggest all brothers keep to groups of 7 to 12 with one Amir. This is protection to keep the cover of other groups from being blown, which we will discuss further, inshallah.
- To ensure that there is sound and actionable evidence to convict you for a long period of time (slam dunk). Agents love to have solid evidence and it flows well with their taugoot agenda. But as

we all know, they will also try to frame or entrap you as well. The agents may have speculation that you are dangerous, but cannot prove it at the current time. This is why counter surveillance and covering your communications is of the greatest importance.

**Agent Surveillance:** (Cell phones) Know, my dear brothers and sisters that the agents love your cell phones. If you have a home phone, get rid of it. Recent information has clearly revealed that your camera, mic, browser and location can be accessed with ease.

You must learn the difference between what we call "sensitive" and "nonsensitive" communications, locations and meetings. If you are doing something sensitive, you must remove your cell phone battery. The taugoot can retrace your location based upon the towers your cell phone connects to (triangulation). They can also discover your identity and who else is in the area with you.

One way to lessen the chances of your identity being discovered is to purchase prepaid cellular plans and stay away from contract cellular plans. But always remove your battery before going to

sensitive locations, meetings, protests etc. If you must take pictures, use a digital camera instead of your phone.

And know, may Allah have mercy on you, that if you have a cell phone that you use for sensitive matters, do not take pictures of yourself or your surroundings. Your cell phone is easily hacked by the government. Hidden in your pictures are tiny bits of information that can reveal the location, time, and date that it was taken. They do not care about the "rights" of Muslims.

So, don't be naive to think that you have a right to be somewhere or a right to speak to someone. These are tricks the shaytaan implants in the hearts of his followers.

**GPS tracking devices:** Be careful of your car's built-in gps; it uses satellites and can always be hacked or mined for your driving patterns and/or locations traveled. The Agency loves to act as a lion to the gazelle. It wants to be able to predict your movements. Gps tracking is a real problem. You can always look and examine your car for planted gps tracking devices usually hidden under the car in tire wells, under bumpers or in the engine compartment. Strange, unfamiliar wires

are usually a clue.

Many newer cars are now equipped with ONSTAR security which can reveal where you are and has a built-in mic so private conversations can be eavesdropped on, so it is best to disable it for privacy concerns.

There are always ways and tools to find these devices. If you're going somewhere sensitive, perform counter surveillance and don't use your normal car or if you must use your normal car, make it a long distance to walk to your meeting place. Take no cell phones and cover your mouths while whispering.

Wiretapping is also still very common for agents. Make checking for listening devices a common routine during sensitive meetings. Execute on the spot anyone with a wire. Invest in a metal detector to scan for weapons. This will help until the taugoot increases their budget to get undetectable brands. If someone is wiretapped they will speak louder, repeat your words, and act nervous.

Always be armed during sensitive meetings, if you are caught or apprehended, it's better to die shaheed than to heal the hearts of the kuffar by

putting you in their circus shows to dance you around before they sentence you to life in prison.

**Computers and laptops:** First thing is that your webcam should never be uncovered. Put a bandaide or sticker over it. Never search or watch anything sensitive (jihadi content or scholars of the haqq) without using TOR network. Store sensitive files and documents on an encrypted usb drive and keep it in a safe location when not being used. If you feel you will be raided, remove the hard drive from your laptop or computer before you get rid of it. Break it to pieces and throw it in water or burn it. A good habit is to not watch sensitive things or send sensitive communication over your home wifi at all.

Unfortunately, the most common forms of agent surveillance are the Muslim communities in America. O Allah, expose and destroy these munafiqeen. Your local Imam is most likely in regular contact with the Agency. They are openly trained to spot mujahideen. So are the local muslim community members. The local mosque has agents visit openly and give khutbah to the brothers, even though the Agency arrests, entraps, and blackmails their brothers daily. La hawla wala quwata illa billah!

**How to spot an agent:** Agents are most likely white males between their upper 20's and upper 30's. (sometimes sisters will be contacted by female agents) They are almost always in shape, clean haircut, with a very observant look at all times. An agent loves to observe the room to report back to his masters. They will most likely sit at the back of a room while trying not to speak. Agents drive all types of cars. They love American made models. An agent has very little knowledge of the seerah of Rasulullah alaihie salam and won't comprehend aqeedah matters. Ask questions like these to discover them. An agent will look through you when talking in order to examine your facial expressions and body movements; they cannot control this. An agent is not always available and won't have a regular schedule because this is his job.

An agent will not come on official business alone. They are always in pairs. They do not care about lying to you. Never trust an agent. If you are a mujahid and you get a visit from a pair of agents, do not speak with them without a lawyer and don't be fooled by them. They will try to say, "why do you need a lawyer if you are innocent?" To them, you are not innocent. You are a radical jihadi. If

they come in pairs, your cover is blown but you are not out of the ajr (reward) of qitaal.

Shred all evidence linking you to any brothers. Destroy phone, hard drive, papers, plans and keep your AK-47 loaded, waiting for a no-knock entry. And prepare yourself to go into hiding or die in honor or to be muted in their prisons. Agents have the most dirty tactics, while having the cupcake muslims believe that they are their friends.

**Agent Tactics:** Agents love to work in pairs and are rarely alone. They will knock on your door and ask questions that they know the answer to. Do not answer any questions and be harsh in your answer (The redneck american community are famous for this) They want to let you know they are suspicious of you, get intel on what you know, and frighten you from your plan. If they really knew you and your threat they would raid your house when you are unsuspecting in order to get you and all your evidence at the same time.

**Entrapment:** Sending toy muslims to pretend they want jihad. They pretend to have skills or valuable information to offer. Rarely does a toy Muslim want to perform a "crime" or execute a person. Set

them in these scenarios and test their nerves and how the person responds.

An informant in America is almost always a new muslim, they are almost always "new" to the community or just showing up out of nowhere. Don't trust new people at this time until the effort is widespread and openly accepted. Pray for them and ask Allah to hand you proof that they can be trusted. Mostly, the plots we have seen were created by the agents and their donkeys (toy muslims). So, if a new shahadah has a plot, and a plan, and he just arrived two months ago, he's most likely a donkey.

Informants have had a free reign in this country, thus it has become popular and big business. Start executing them and it will disperse those behind them. Most agents want to visit the mosque to have you accept them and put you on their payroll. If you are not harsh to them, then you allow them to "use your airspace" while they arrest, persecute, and blackmail your brothers. Be harsh and get a lawyer. Be careful not to call upon the CAIR organization hastily. They are RAND Muslims and will give you up if needed to save their skin. Their aqeedah is false and their foundation is baatil. Fear Allah and call only on Him and then upon the

al muttiqueen.

**Blackmail:** Agents blackmail when they have a higher priority than you and want to use you to get the priority. Dont take money from agents, gifts, recommendations, or anything. They never give something to you without expecting something in return. All these gifts have strings attached. We know mujahid brothers who had to fight tooth and nail to escape their "strings". Rule of thumb, be harsh and drive them away and never allow them in your house or car.

They are gang-bangers that use the same smear tactics as the NYC police and other crooked cops. They plant evidence, bribe, threaten to take your visa, and threaten to imprison you on false charges. If an agent can murder you with a bullet to the head during interrogation, that means that they have taken the gloves off with the muslim community. So take your gloves off, may Allah increase you in His Reward. If you want to free yourselves and your communities of the taugoot agents, be harsh against them and give them no refuge.

### \*\*\*GPS for The Ghurabah\*\*\*

**'ilm and ikhlaas:** Umar, RA, said he heard Rasulullah alaihie salam say, "Verily deeds are but by their intentions.." Know, my dear brothers, the path of jihad is the highest honor and the most rewarding before Allah.

"Verily those who believe and those who make hijrah and fight jihad for the sake of Allah. It is they who hope for the mercy of Allah..."

If you're not ready to die at any moment at any time, stop reading this naseehah right now. This path is not for you. Go and learn the daleel for jihad fee sa bilillah and its virtues. You cannot be a mujahid and be afraid of death.

The American TV shows where the hero always gets away has corrupted your thinking. This is not a game, it's very serious. Just you reading this article can get you arrested.

**Be grounded in knowledge and taqwah.** Make sure your intentions are not for anything else but for Allah Azza wa Jal. Be sincere and Allah will accept you, if you're angry and want revenge, that's good but aren't you afraid that your reward will be

tainted? Make your efforts for the pleasure of Allah and Allah will complete His favour on you.

Allah said, "verily Allah has purchased from the mu'mineen their lives and their properties in return that He will grant them Jannah." 9:111.

If we see in you insincerity, we will turn you away and Allah knows the hearts of His servants.

The greatest Imam to come from our land, and Allah knows his servants, was Sh. al-Awlaki raheemahullah. He quoted that when we go out to battle, load ten bullets. Nine for your internal enemy and one for your external enemy... Although this was not his statement (Sh. Azzam, raheemahullah).

This means, may Allah have mercy on you, the internal enemies are more dangerous to you than the external ones. Our advice is to abandon the masaajids of dararr and form your own mosques, even if in the woods. These masaajids are dangerous recruiting grounds of the kufar. When the agents are treated harshly, and the enemies of Allah have no safe haven in them, we will return. But as long as the cowards are heroes, the informants are allowed to nest their maggot eggs,

and the celebrity sheikhs known for praising our enemies are present, we will be absent. May Allah bestow sabr on us all.

Form prayer groups in your houses and invite each other to share knowledge of this deen from house to house, from forest to forest and from cave to cave. If your masjid is calling to elections and interfaith and having agent job fairs in your mosque, then know my dear brother, that is masjid dararr. We ask Allah to free our masaaajids and purify them with His servants that love the Hereafter more than this dunyah.

There are pacifist muslims, RAND munafiqeen, apostates, celebrity scholars/imams, who are corrupt and cowardly inward enemies. Don't allow them to deter you from the path of Muhammad alahie salam, and the salaf. Busy yourself in learning the seerah of Rasulullah alaihie salam. All of the guidance for jihad are present therein. Be a follower and nothing more. Learn these types of "frenemies" by their signs. Allah will expose them before you if you are knowledgeable of the sunnah of His Messenger alaihie salam. Decide what kind of fight you want to fight and with no doubt it is Fard 'ayn to fight. We will be an argument before Allah for the ones who lived in a land where they

work hard to revive the sunnah of the people of Lut, where the faggots are rulers, the child rapists get slaps on the hand; where our guns are prohibited to carry and our brothers blood are plotted against day and night!

**Fight with your hands.** If you want to fight with your hands, be like an agent undercover as the manual teaches in, "Mujahideen Survival Guide for 2015". Blend in within plain sight, pile weapons to meet the enemies of Allah, take their wealth by force, raid their caravans to fund your cells, and keep secure your communications. Mujahideen in the West who are prevented from hijrah, who don't have the funds, and are being monitored, we advise you to remain in your land and form cells of 7 to 12 brothers. Start chopping the heads of the kuffar who are mocking Allah and His Messenger alaihie salam and who are plotting day and night to kill your people. Leave the munafiqeen until the heat starts to get hot and the masses can clearly define the munafiqeen from the mu'mineen, lest they say we kill our companions without knowledge.

**Fight with your wealth.** If you want to fight with your wealth then send it to ash Sham. It will be as if you fought (we will ask for donations later, if

needed). May Allah enrich us from His bounty.

**Fight with your tongue.** If you want to fight them with your tongue, then let them hear what displeases them. You can do Twitter, blogs, protests, tv interviews, appearances, and letters. Speak out against the evils of shirk, oppression, the revival of the sunnah of qawmu Lut, the drug epidemic, police brutality, nakedness and promiscuity, the military industrial complex, the corrupt laws tailored toward the rich, and the brainwashing indoctrination they call public schools. Let them, by your tongue, bleed in anger and die in their rage!

But I also must warn our brothers, don't become too harsh against the enemies of Allah and lose who Allah wants us to be; harsh on the kuffar and compassionate towards al mumineen. Remember, to lower your wings and explain with sabr and daleel to the coconuts. But if they turn away, then we leave them with evidence and the favor of Allah upon us, be'ithnillah.

**Get connected to a cell.** If you cannot get connected, then get prepared until Allah provides for you a way. Many brothers are on Twitter and Kik. They will know how to connect you with us,

inshallah.

**Using your cell phone.** You will need to download an app from the android market to hide your IP address and browse anonymously, use encryption messaging like SureSpot. Send encrypted emails only. Encrypt all of your communications, because the kuffar love to learn your routines. This is why counter surveillance is very essential.

**Using your computer.** Set up an anonymous Mail2Tor email account for sending encrypted emails and files. This will require the use of an encrypted jump drive. Download the software to your jump drive from the Tor network. Always keep your sensitive files and communications on it and store the drive in a hidden location.

**Counter surveillance.** Counter surveillance reveals if you're being monitored or not. Deceive them and plant intentional misinformation in order to see if you're being watched. Bury packages in the countryside and record who shows up, pretend to meet mujahideen and see who follows or is present, pretend to have fake accounts and monitor who is interested. Deceive them, lie in wait for them in order to expose if you're being tailed. Always be aware of who is around you. Double

back, circle around country roads, and in deserted places in order to reveal any surveillance. Place misinformation for them to get to easily to detect their methods and anger them, may Allah accept from you.

Most informants have a bogus story about their life in order to hide their true identity. Send brothers to check their story and if it does not equate, then he's most likely a donkey of the agents or an undercover agent. But beware my dear brothers, shedding the blood of another muslim without authority from Allah, is a major sin and all blood must be accounted for on the Day of Judgment.

**Be prepared.** Be mentally prepared to die shaheed or be imprisoned or be in hiding. Don't be a half mujahid and not be prepared for the ultimate sacrifice. Take your precautions, tie your camel, but do not be afraid to leave this prison (dunyah). If you die shaheed, Allah will forgive your sins before the first drop of blood hits the ground. He will save you from the punishment of the grave, and allow you to roam free with provisions in the breast of green birds. He will remove fear from your heart on the Day of Judgment, and enter you from a noble gate in Jannah, inshallah. Divorce the

dunyah and erupt the volcano of jihad in the land of harb (war). The caliphate has been established upon the guidance of the Prophethood. Hasten to accept these nobile times and race with me to Jannah.

**Final Advice:** My final advice to my brothers and sisters in America, fear Allah and don't allow them to take you to prison. We see here again and again the humiliation and isolation that our brothers have been subjected to after being caught. The agents place you in prison for 15 - 25 years or for life in silence. This heals their hearts and quenches their souls for them to be able to interrogate, torture and parade you around. Stop going to jail, willingly. If your cover is blown or you are waiting for them to convict you, die shaheed. Take their lives but we say take the lives of their ahlul hawl wal 'aqid. Avoid their non-combatants, may Allah make you successful. Stop going to jail brothers. Boobie trap your homes, lay in wait for them, never leave your home without your AK-47 or M16. If you're in deep, don't allow them to even get you at a traffic stop. May Allah bless you.

My dear brother, my last words for you now are to seal your book of records with your blood and make dua for the author. I pray Allah will not cause

you to take these word lightly. Allah humma sallie  
ala muhammad wa taqabal minnaa innaka anta Al  
Azeez Al Hameed.

- Abu Ibrahim Al Ameriki
